PERSONAL PROFILE

A diligent and enthusiastic software engineer who possesses exceptional problem-solving skills and communication skills, and thrives working both in a team and independently.

IT WORK EXPERIENCE

Gekko Lab (Cyberport, Hong Kong)   Aug 2023

Gekko Lab is an award-winning Hong Kong-based AI technology company for financial intelligence and investigation, whose knowledge management software enhances users' capability to detect and manage risks using data analytics. I helped build the landing page of the company, as well as designing the technical documents of the top leading company's software.

Software Engineer Intern

- Worked closely with various designers to address design-related challenges and provide technical solutions.
- Continuously optimized the code to improve the overall design implementation and user experience.
- Utilized HTML, TailwindCSS, and Vue.js to seamlessly convert design concepts into robust and high-quality code.
- Ensured responsiveness across different devices and screen sizes, allowing for a consistent and optimized user experience.
- Documented features and technical details for future reference.

Quantr Limited (Lai Chi Kok, Hong Kong) Mar 2022– Jun 2023

Quantr is a Hong Kong-based company developing market-leading, cutting-edge educational software to teach students comprehensive electrical engineering knowledge. My role involved actively contributing to developing multiple software applications using Java. Additionally, I created unit tests to ensure the reliability of the software.

Java Developer

- Engaged in various activities throughout the Software Development Life Cycle to contribute to developing and implementing application systems.
- Designed and crafted efficient code in Java to add features and make the software work properly.
- Identified and troubleshooted technical issues, ensuring timely resolution and an enhanced user experience.
- Collaborated closely with the development team to understand project requirements and contribute to the design and architecture of the educational software.
